SCHEDULE

2021 SUSTAINABILITY ROADSHOW

08h30

Arrival

09h00

Welcome & Intro

9h10

Session 1 (Pre-recorded Video)

John Kemp (GEO)

- Club Sustainability Made Easy & Examples of Actions
- Sustainable clubs are more efficient, more popular, and more future proof; overcoming risks of regulation, cost, resource availability, and the impacts of climate change, and promoting themselves in ways that matter to the next generation of customers.
- The only question now is - how can your club deliver this too?
- This 20-minute session will provide an understanding of the issues and opportunities of sustainability; the practical actions that have the most impact; examples of what clubs have done in South Africa and worldwide.

09h30

Session 2 (Live + Q&A)

John Kemp (GEO)

- A New Way to Measure Your Sustainability
- People want to know that their club and golf course is having a positive impact on the world... so how do you show it?
- This practical 20-min session will help you to measure the positive impact that your club and course has on the environment and the community. You will identify ways that you are a leader and where you can possibly improve... and actions to take to make those improvements. Together we will show the value that clubs provide to the climate and our communities!

9h50

Tea break

10h15

Sustainable Solutions

Sue de Zwart

10h45

A new take on oils

Vince Correia
