

# Turf management programs to stay in control.

Talking Turf are the distributors of Syngenta products to the Turf Market of Southern Africa. See below for a complete range of products to help turf managers stay in control of pests or disease and improve turf quality.

## Banner® Fungicide

BANNER Turf Fungicide is the trusted choice to use curatively when disease symptoms become apparent. The fast absorption and systemic movement combines to ensure effective "stopping power". Gives excellent control of Dollar Spot, Anthracnose, Brown Patch, Powdery Mildew, Rust and Leaf Spot.

- Broad spectrum control of major turf diseases including Dollar Spot, Winter Fusarium and the ERI complex (Couchgrass Decline and Take-all Patch)
- The number 1 choice for effective Spring Dead Spot control
- An early curative option as a result of the combination of fast absorption and even systemic movement
- Technology that allows excellent tank mix compatibility with other fungicides and foliar fertilisers
- Low odour, non-staining formulation

## Heritage® Turf disease protection

Heritage is a systemic strobilurin fungicide, rapidly taken up by growing plants; foliage, crown and roots. Heritage provides powerful protection; targeting the pathogen at the early stages of the infection, eliminating disease before it has chance to cause damaging effects on turf.

- Control and prevention of a broad spectrum of turf diseases including Pythium, Anthracnose, Brown Patch, Helminthosporium and Spring Dead Spot
- Consistent systemic protection of new growth for up to 28 days after application
- The option to tank mix with DACONIL WEATHERSTIK or MEDALLION Turf Fungicide to get the combination of systemic and contact action for high risk periods
- Technology that ensures excellent tank mix compatibility with other fungicides, foliar fertilisers and PRIMO MAXX
- A low odour, non-staining formulation

## Daconil Weatherstik® Fungicide

DACONIL WEATHERSTIK Turf Fungicide is an excellent choice as the basis of a preventative program. It is an effective contact fungicide that delivers excellent protection for up to 14 days against Dollar Spot, Brown Patch & Grey Leaf Spot.

- Broad spectrum control of major turf diseases including Dollar Spot, Winter Fusarium, Brown Patch and the Helmo complex
- A fungicide that sticks and stays under tough mowing and irrigation practices
- The option to tank mix with BANNER or HERITAGE to achieve systemic and contact action
- Strong resistance management abilities when used in rotation with multi-site products like MEDALLION Turf Fungicide
- High quality suspension concentrate formulation with low odour and non-staining properties

### FUNGICIDE PROGRAMS

## Primo Maxx® Plant growth regulator

PRIMO MAXX is an efficient and versatile turf management tool that maximizes turf quality, pre-conditions for stress prevention, and optimises resources. PRIMO MAXX Turf Growth Regulator will promote greener, denser, more resilient turf with less growth, fewer clippings and therefore less expensive maintenance. PRIMO MAXX is the trusted growth regulator that pre-conditions turf for stress and optimises surface quality and colour.

- Enhanced playing surfaces with improved turf quality and colour
- A valuable tool for pre-conditioning greens for hot, stressful summers – treated turf grows a stronger, deeper and more robust root system which leads to better heat stress tolerance, less wear and tear, and improved disease and pest tolerance
- Regular applications deliver increased quality and durability

### PLANT GROWTH REGULATOR

## Meridian® Herbicide

MERIDIAN Turf Insecticide achieves the perfect balance of solubility and soil binding. Once correctly applied and washed in, this versatile insecticide has great bioavailability ensuring season long grub control in situations where irrigation is irregular.

- Flexible rate range with residual control of up to 3 months
- Superior bioavailability in soil at lower soil moisture levels compared to imidacloprid making it a more consistent performer throughout the season
- A versatile option to use on sporting fields, parks, ovals, fairways and other situations with irregular irrigation.
- Rapid uptake and efficient movement within the plant root system.
- Insect pests stop feeding within an hour after contact with Meridian.

### INSECTICIDE

Syngenta XC Nozzles are a breakthrough in turf application technology, to deliver better and more accurate results.

XC TECHNOLOGY	Syngenta Turf XC Nozzle range availability					
	Size	Typical water volume (l/ha)	Typical spraying speed (Km/hr)	Recommended use	Best used with	Benefits
	04	220-400	5-7	Foliar fungicides; herbicide and growth regulator.	Primo Maxx Heritage Banner Daconil Weatherstik	<ul style="list-style-type: none"> <li>• Maintains an even spray</li> <li>• Combats spray drift allowing more spray</li> <li>• Backwards spray angle enhances coverage even at low water volumes</li> </ul>
	08	450-1000	5-7	Fungicides targeted at soil application and wetting agents.	Heritage Meridian
